

The Tectonic Pack Indoor & Outdoor Table Tennis Tables

The Tectonic Pack Table Tennis Tables have been designed for recreational use.

Playing Surface

16 mm high density chipboard tops (indoor model) and 4 mm resin laminate tops (outdoor model) provide a good bounce.

Outdoor tops are weather resistant (sun, rain, snow, frost) and can be safely left outside without any risk of deterioration.

Guarantee

3 year guarantee on playing surface (outdoor model) plus 2 year guarantee on all other parts.

Net and Posts Set

ABS net posts are integrated into the carriage and are permanently attached to the table to save time at each set up. Polyethylene net included.

Frames

Corrosion / scratch resistant steel frames increase the rigidity and flatness of the board (40 mm on outdoor model, 30 mm on indoor model).

Leg Assembly

25mm steel legs for stability and minimum storage space.

European Directive

Conform to the European safety norm EN 14468-1

Folding System

Compact folding system designed to handle the table safely and with ease, at the same time minimising storage space.

Locking Mechanisms

The safety system incorporates 2 locking points in the storage position and 2 locking points in the playing

Wheels

130 mm banded wheels allow easy movement of the table for storage.
